

**AXIS PARTICIPATES IN CADRE TECHNOLOGIES USER CONFERENCE
--DISCUSSES CUSTOMER CHALLENGES AND SOLUTIONS**

Maspeth, New York, November 28, 2012—Axis Global Logistics was one of the participants in the 2012 Cadre Technologies User Conference which was held recently in Denver, Colorado.

The two-day event took place at the Denver Marriott Tech Center and was attended by key Cadre customers and partners. The conference focused on high volume eCommerce fulfillment software and warehouse logistics software.

Axis was one of several Cadre customers to present based examples of fulfillment operations facilitated by Cadre's Cadence Fulfillment system. Axis and the other presenters discussed customer challenges and innovative solutions in meeting increasing volumes and complexity. Other presenters were International Marketing Group, TAGG Logistics and Bonded Logistics.

Cadre Technologies is a leading innovator of software for fulfillment and logistics operations including order management, warehouse management, transportation management and activity billing. The company is based in Denver, Colorado with offices in Lenexa, Kansas and Maryland.
