

Direct to Store: Cutting-Edge Retail Logistics

Delivering Solutions to the Retail Industry

In a business environment that becomes more competitive with each passing day, companies must continually stay ahead of the curve and make smart decisions. This is especially true when it comes to something as critical as logistics, which, if not

managed properly, can seriously impact your bottom-line. No where is this more apparent than in the retail industry where logistics plays a key role due to the fact that success or failure can hinge on being able to quickly respond to ever-changing customer demands.

That's why so many major retailers now partner with Axis Global Logistics.

They know that Axis' direct to store program offers retailers the fastest, most reliable service available. These retailers also know that Axis will provide them with an overall supply chain solution designed specifically for their industry and their business – a solution that will optimize your costs and efficiency so that you can navigate those fluctuations in demand when dealing with such issues as the set up of visual merchandise and

POP displays for new product launches, or the time-sensitive delivery and installation of store fixtures for resets, remodels and new store construction.

At the heart of any Axis solution is a state-of-the-art transportation and warehouse management system that offers you both flexibility and real-time visibility when it comes to your shipments and inventory. It is this industry-leading technology – coupled with the highest possible degree of personal service – that truly defines an Axis solution.

Simply put, Axis' direct to store program is the cutting-edge of retail logistics.

Direct to Store Services:

- Project management – fixtures, graphics & POP display installations.
- Site surveys and audits.
- Management of nationwide store distributions and rollouts.
- Vendor management – inventory and purchase order management services.
- Time-critical transportation – air & ground, air ride, team drives, LTL, FTL.
- Comprehensive warehousing network.
- Consolidation management.
- Mall, after-hour & inside delivery options.
- Reverse logistics.

General Services:

- Time-critical transportation services – air & ground.
- Blanket wrap, air ride equipment, lift gates, flat bed services.
- Global capabilities – locations across the country, hundreds of Axis agents worldwide.
- Flexible, around-the-clock service – 24/7.
- Industry-leading technology – our web-based Axis Trak system gives you real-time access to your shipment status.
- Cadence Warehouse Management System – web-based order management, purchase order management, and perpetual inventory visibility.
- EDI transactions – 214s, 856s.
- Automatic POD notification – you will know when your shipment arrives.
- Personal service – wherever and whenever you need us.

Axis can design and implement a customized logistics solution that will increase your efficiency and cut your costs. Please contact us for additional information about Axis' solutions for retailers and for a thorough discussion of your needs.
